MEMORANDUM

TO: Boston Association of Structural Engineers (BASE)  
Attention: Joseph J. Zona, President

FROM: Jeffrey W. Struble

REFERENCE: Structural Engineers Emergency Response Plan (SEER Plan)

SUBJECT: Status Report for May 19, 2004 BASE Meeting

DATE: May 11, 2004

---

As you requested, I am writing to present a report of the activities of the SEER Plan committee over the past weeks for the information of BASE members.

Since the last BASE meeting report, no progress has been made in the development of a SEER Plan for the consideration of BASE members. This is due to an extremely heavy work load undertaken by myself, leaving no time for coordinating the volunteer efforts of those BASE members who have offered their assistance in this endeavor. My apologies to the BASE membership and officers, but work had to come first.

I shall try to marshal the talents of the members who showed interest in developing a SEER Plan and research the organization needed for Massachusetts structural engineers in this matter. It is hoped that a reasonably comprehensive presentation of the pros and cons of a BASE-developed SEER Plan can be made in the fall for the consideration of all BASE members.

Cc: Cindy Chabot, Secretary-Treasurer
