

BUILDING ENVELOPE/ENGINEER/PROJECT MANAGER JOB POSTING

At Vital Structures LLC, we are a team that is on a mission to protect and restore the New England community through building envelope sciences and structural engineering. If you are looking to join a team of building envelope experts, as well as be an industry leader in engineering services, then Vital Structures LLC is the place for you! Join us for career training and development, an exceptional work environment, a sense of family and community, and allow us to reward you for your accomplishments. It is our day-to-day goal to provide unique and innovative opportunities for our teammates and strive for continual career and company development. Find your future with us!

We offer a comprehensive benefits packages including health insurance, dental insurance, 401(k), paid vacation time, paid holiday, continuing education, professional development and tuition assistance.

The Role:

Vital Structures LLC has an opportunity for a self-motivated and results-driven Building Envelope/Engineer/Project Manager to perform, assist and manage projects to fulfill a broad scope of client needs. You will be engaging in field work at sites ranging from new to 150-years-old. You will be performing design calculations, attending pre-bid and pre-construction meetings, drawing/detail preparation, design, bid assistance as well as construction administration services. We look forward to having your extensive knowledge of building renovation, building codes and current industry standard on our team to bring value to our clients. Your knowledge of material manufacturer systems and products, research, communication and specification will bring great value to our team. You will be a key player in assisting with company marketing and business development and showcasing customer service excellence through everyday job duties. You will have the opportunity to lead by example every day by managing projects, clients and subconsultants, as well as foster an environment that will keep our valued clients coming back for more.

We want your time at Vital Structures LLC to be transformative. We pride ourselves on providing a clear career path with opportunities for leadership, personal growth and professional development.

Qualifications:

- Bachelor's Degree in Civil Engineering, Architectural Engineering, or similar accredited degree required.
- 4+ years' experience in Building Technology, Structural Engineering or Architectural Engineering required.
- E.I.T Registration required.

- P.E. License preferred.
- Excellent verbal and written communication skills
- Valid driver's license
- Authorization to work in the United States

Company Overview:

Vital Structures LLC is a consulting engineering firm that specializes in building envelope sciences and technology, structural engineering and the repair and restoration of buildings. Our client base includes mostly private commercial, industrial, institutional, educational, medical, life-sciences, condominium and residential properties. The services we provide include property evaluation, assessment and condition surveys, forensic investigation of leaks and other construction defects, construction design and specification preparation, project administration and contractor oversight, and litigation support. Vital Structures LLC was founded in 1991. We have two office locations that serve Massachusetts, New Hampshire, and Rhode Island, as well as greater New England.

At Vital Structures LLC we strive to bring a unique and extraordinary experience to both our customer base as well as to our valued employees. As a company we are constantly looking to improve the operations of our firm as well as grow our business. It takes each member of our team, working together, to achieve our mission.

Vital Structure LLC is an Equal Opportunity Employer
